Groups and Volunteer

Women in Cyber Security

Fort Collins, CO | August 2021–Current

- The group is not just for women, it is open to everyone. The club is designed to get more women into the field and anyone else who is interested in Cyber Security.
- Discussed theories on Block Chain and how different versions will change the landscape from current versions of block chain.
- Meetings are surrounded on cyber security programs that industry leaders use on a regular basis.
- Involvement with the group helps explain tips on cyber security, the industry, and concepts around programs.
- Internships and other opportunities are offered within the meetings.
